Gold Leaf & Gilding Products

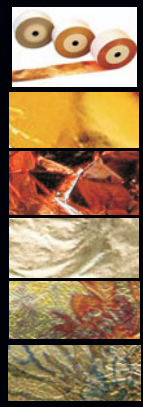

Genuine 23K Gold Leaf

Available in books of 25 sheets measuring 3-1/8" x 3-1/8" The sheets are referred to as leaves. Our leaf is the finest European leaf available. The term Patent Gold Leaf refers to the light tissue backing on which the leaf is mounted. The tissue allows you to easily lift each sheet from the book and place it more precisely to the area to be gilded. The tackiness from the gold size will pull the leaf off the tissue backing and secure it to your design. A guilders tip is not necessary with patent gold leaf. Patent Gold Leaf is ideal when applying Gold Leaf to a flat surface area and is preferred in most automotive graphic applications. One book will cover 1.5 sq. ft. with minimum overlap. Part# **KUS 23K-BOOK**

Genuine Silver Leaf is available in books with 25 sheets measuring 3-1/8" x 3-1/8"
Part # **KUS SILVER-BOOK**

Ribbon Leaf

Ribbon Leaf is manufactured for gilding narrow stripes or large expanses with imitation gold, aluminum, copper and variegated leaf. All forms of ribbon leaf are appropriate for indoor use. Imitation gold and copper leaf must be sealed to prevent tarnishing.

Ribbon leaf is manufactured by placing individual 6 1/4" squares of leaf overlapped by 1/4" on a continuous roll of paper, which facilitates handling. The leaves are lightly attached to the paper by a thin layer of wax. The overlap lines are faintly visible on the gilded surface and repeat regularly at 6" intervals. The ribbons come with clean and even edges.

Imitation Gold #SR2125, Copper #SR2135, Imitation Silver #SR2140, Red Variegated #SR2155 & Blue Variegated #SR2165 Available on 1/2"x32" Rolls

Books of 25 Imitation Leaves Available in Gold, Silver & Copper

Each book has 25 leaves measuring 5-1/2" x 5-1/2"

Gold Leaf Clear Sealer Part#KSE798
Gold Leaf Clear Sealer is an exceptional, self-leveling durable clear top coat sealer for use in gold leafing. KSE701 Hardener may also be used for added gloss and durability.

Super Fast Gold Size Part# KSE799
Super Fast Gold Size is an exceptional, self-leveling and very fast setting size for use in gold leafing. The Super Fast Gold Size allows gilding to begin in as short as 15 minutes, and an open time of about 45 minutes. Because of its fast speed, it is recommended that for large areas you should limit application of the gold leaf size to an area that you can work in 30-45 minutes. KSE799 is available in 4 ounce cans and 1 pint cans.
