

DESICCANT SNAKE

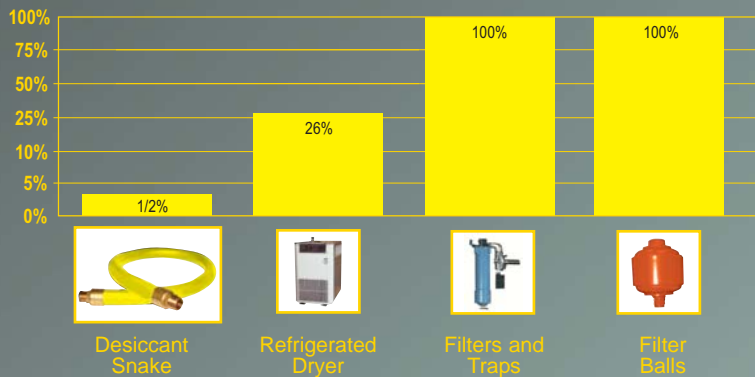

In-Line Compressed Air Dryer Model DS-20* Part No. 130502

The Desiccant Snake in line compressed air dryer can be used for any point of use application that you want to protect from moisture, oil or dirt and has a capacity of up to 20 scfm.

Typical compressed air is saturated with 100% relative humidity. That means the compressed air is carrying a lot of moisture vapor when it goes into your paint gun or point of use application. The Desiccant Snake removes moisture vapor down to 1/2% relative humidity.

Relative Humidity remaining in the compressed air after treatment†

† Based on 80° Inlet and 100 PSI

Filters and traps DO NOT REMOVE ANY MOISTURE VAPOR from the compressed air, they simply remove LIQUID water from the air line.

The best refrigerated air dryer on the market removes moisture down to about 26% relative humidity. The Desiccant Snake gives you air that is about 52 TIMES DRYER than a refrigerated dryer.

Features

- The Desiccant Snake contains special desiccant and has a unique design that ensures maximum compressed air to desiccant contact time.
- The Desiccant Snake contains four built-in filter elements that remove oil and dirt.
- The Desiccant Snake has 1/4" BRASS thread connectors.
- Good for up to 20 SCFM
- 200 PSIG maximum pressure rating
- 150°F maximum temperature rating

Benefits

- The Desiccant Snake will remove moisture vapor down to 1/2% relative humidity and GUARANTIES ZERO paint defects caused by moisture.
- Having multiple filters increases the life of the Desiccant Snake and protects your tools from oil and dirt.
- The Desiccant Snake is safe and trustworthy to use in the paint booth. The plastic thread connections used on filter balls and other competitive products are fragile and tend to break off or leak.
- The Desiccant Snake has enough capacity for even the heartiest of H.V.L.P. spray guns as well as conventional spray guns.
